

# Garages

## Safe and protected

A Tru-Bilt Garage is second to none and has many different applications. Your Tru-Bilt Garage is available in many shapes and sizes and is designed to be practical and long lasting. Tru-Bilt Garages are manufactured under strict engineering standards and are incredibly strong. To make things even easier for our customers, we are licensed registered builders and can build your garage in and around Melbourne or have one of our Local Resellers throughout Victoria build it for you.

We start with a smart design and use only the best materials available. Our rigorous manufacturing process ensures

that our all our products are second to none when it comes to quality, strength and durability. We can manufacture a Garage to suit your surroundings whether you are in or around Melbourne or throughout Victoria.

There are a number of different size and style options to select from to build your desired Garage. An excellent range of colour combinations are available and roller doors can be automated. Sliding doors are the best choice when maximum head room clearance is required. Internal partitions can also be added to separate areas within the Garage. We can build your Tru-Bilt Garage to suit your every need.

Perfect for storage

Any size any colour combination
