

Hay Sheds

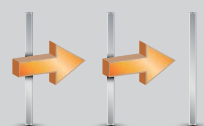

Built for farm life

At Tru-Bilt, we have been manufacturing hay sheds, farm sheds, carports, garages, barns, hangars and custom sheds for 50 years. All Tru-Bilt sheds are manufactured in Melbourne from quality materials to the highest standards. The Rectangle Hollow Section (RHS) column and open portal design are manufactured to last. The open portal design provides maximum clear storage space with minimal loss of head room.

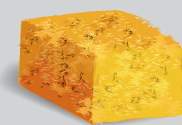

Tru-Bilt do all the extra work at the manufacturing stage which means your hay shed or farm shed can

be built on site in no time. When you purchase a Tru-Bilt hay shed or farm shed you're purchasing a cleverly designed and durable shed that complies with the Australian standards. Tru-Bilt hay sheds and farm sheds are easy to erect and have been engineered to withstand the elements and harsh conditions.

The open portal design allows for easy access. Whether you're keeping your livestock safe, protecting your expensive farm equipment or storing your hay, we have a hay shed or farm shed to suit your needs.
